| TaskID	User Story, Activity, Description
W4	WEEB-4: Use a pre-existing template to create a card
W31	WEEB-74: Load and store template
W71	WEEB72 WEEB73: Create canvas editor interface
W5	WEEB34 WEEB35 WEEB36: Click a shared link to view a card
W83	WEEB-92 WEEB-93 WEEB-94: Create user dashboard
W16	WEEB-41 WEEB-46 WEEB-48: Limit card creation unregistered user
W82	WEEB-82: Setup redux
W84	WEEB-84: Consistent page size
W85	WEEB-85: Nice user interface across the whole website
W87	WEEB-87 WEEB-89: Integrate creating template with new interface
W86	WEEB-86: Upload images/audio/video
W88	WEEB-88: As a user explore other greeting cards
W90	WEEB-90: As a user edit my profile
W8	WEEB-8: As a user I want my card hosted on the site to view
W10	WEEB-10: As a user receive emails to recover password
W59	WEEB-59: As a user see premade components to add to card

W8	8	W4	*
W10	8		
W59	5	W8	

What we did to stay on schedule: Work was clearly divided at the start of the sprint and everyone worked hard.

What went wrong: All user stories from W4 and beyond were not completed. As we can see from the diagram, a lot of stories were at the end of the critical path which was already very long. Progress along the critical path was slow since group members could not work on their story until after all the previous stories were completed. We learned not to add so many stories reliant on others in the sprint backlog.
